

Investment Opportunity

Production of Sodium Chlorite

Investment Opportunity

Executive Summary

Tawteen's Chemicals and Metals Cluster covers products and services that would support further localization of the petrochemical, manufacturing & sustainability sector in Qatar and would cater to the requirements by Energy Sector Companies. This Tawteen E-Brochure presents the opportunity for investors to establish a local business in Manufacturing of Sodium Chlorite in Qatar.

In essence, Tawteen aspires for the Investor to develop the following local capabilities:

Develop an end-to-end Sodium Chlorite production facility in Qatar including raw material sourcing, production and distribution.

Establish logistical infrastructure to transport and stock raw material and finished products for consumers.

To support this investment, QEWC, the Contracting Entity will issue an RfP to all Investors covering a 5-year contract with committed volume 1050 Ton/annum.

In addition, Tawteen will provide various incentives in infrastructure and supplier development as support to establishment.

Tawteen will also be conducting briefing sessions that will be communicated in the future to fully align on the process of evaluation and expectations of this opportunity.

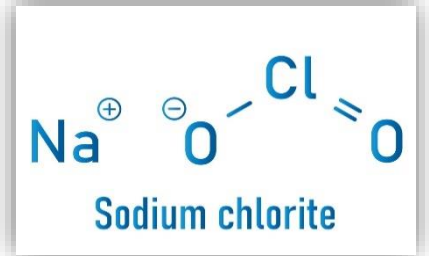

Investment Opportunity

Detailed Opportunity Description

Production of Sodium Chlorite:

- Sodium Chlorite is mainly used to generate chlorine dioxide for treating and disinfecting municipal drinking water or water used in food manufacturing, oil & gas, and other industrial processes.
- It may also be used for bleaching and stripping textiles, pulp or paper.
- Also, used for odor control oxidation and etching in electronics.

Strategic Fit

- Increase local manufacturing capabilities
- Reduce dependency on international supply chains
- Ensure redundancy in supply of this product, which is critical for the country

Localization Opportunity

Scope

- In scope
- Out of scope

Supporting Commitment:

Combined: 1050 Ton / annum for 5 years

Contracting Entity:
