

INVESTMENT OPPORTUNITY:

PROVISION OF DRILLING INSPECTION SERVICES

Executive Summary

Tawteen's subsurface cluster covers the equipment and services required for onshore and offshore drilling, completion, steady state production and water injection operations. This Tawteen e-Brochure presents the opportunity for Investors to establish a local business in providing Drilling equipment inspection services in Qatar to support local oil and gas drilling activities.

Drilling equipment inspection services are conducted on drilling assets to assess the condition of drilling assets. These services are conducted to industry standards, such as API, as well as to specific client requirements. It involves ensuring that the drilling machinery and equipment such as drill pipes, drill collars, pup joints, used oil country tubular goods (OCTG), including blowout preventer (BOP), choke manifold, risers etc. are functioning properly. This service includes performing tests such as magnetic particle inspection (MPI), liquid penetrant inspection (LPI), electromagnetic inspection (EMI), ultrasonic inspection, visual inspection, dimensional inspection & drift inspection.

Tawteen's participating oil and gas operators estimate ~ QAR 8 M per annum to be spent on Drilling equipment inspection services in the coming 4 years.

To support the investment opportunity, the Contracting Entity (QatarGas) will release a Tender where QAR 1.5M – 2.5M per year for 4 years will be committed, as per QatarGas tendering strategy. In addition, Tawteen will provide various incentives across infrastructure and supplier development as will be further outlined in the opportunity investor pack.

Detailed opportunity description
